

Anas Nadeem

Software Engineer

Uxbridge, London, UK | +44 7438 412239 | anass.nadeem42@gmail.com | LinkedIn | GitHub

PROFILE

Computer Science undergraduate at Brunel University London who ships fast and builds with AI daily. First-place hackathon winner (Oxford Physical AI) with hands-on experience across full-stack web development, AI agents, and workflow automation. Comfortable taking a project from idea to working prototype solo — combining Python, TypeScript/React, and frontier-model APIs (Anthropic, OpenAI) to build more than should be possible alone. A freelance automation specialist motivated by early-stage, high-ownership environments where shipping something on a Tuesday moves a real metric by Friday.

EDUCATION

Brunel University London Sep 2025 – Present

BSc (Hons) Computer Science with Work Placement

- Key modules: Introductory Programming, Programming Applications, Data and Information, Logic and Computation, Object-Oriented Programming, Information Systems and Organisation, Group Project (System Design & Implementation).

Beaconhouse School System Aug 2020 – Jun 2025

O & A-Levels

TECHNICAL SKILLS & INTERESTS

Languages Python, TypeScript, JavaScript, SQL, Java, C

Frontend React, HTML/CSS, Responsive Web Development

Backend & Data FastAPI, REST APIs, Webhooks, PostgreSQL, Pandas & NumPy

AI & Automation Anthropic (Claude) & OpenAI APIs, AI Agents, NLP, Sentiment Analysis, Zapier, Make, n8n, GoHighLevel

Tools Git/GitHub, Prompt Engineering, Technical Communication

Interests Formula 1, Electronics & Hardware Tinkering, Competitive Hackathons

PROFESSIONAL EXPERIENCE

Student Ambassador – Brunel University London

Jul 2026 – Present

Outreach & Recruitment

- Represent the university at open days and recruitment events, engaging directly with prospective students and parents.
- Create and share content to promote events and boost engagement among prospective applicants.
- Deliver campus tours and Q&A sessions, translating complex information into clear, persuasive messaging.

Student Leader – Electech

Jan 2026 – Mar 2026

STEM Education Programme

- Coordinated and delivered structured STEM sessions for groups of 15+ participants, managing scheduling, materials, and logistics.
- Produced and edited short-form video content for Instagram Stories to grow social media engagement.

PHP Intern – TallyMarks Consulting

Jul 2024 – Aug 2024

Web Development

- Developed and tested web applications using PHP and HTML; authored and optimised SQL queries for data retrieval and storage.

Software Engineer (Virtual) – JP Morgan Chase & Co.

May 2024

Forage Virtual Internship

- Used open-source visualisation libraries (Perspective) to generate live graphs for real-time data monitoring.
- Resolved broken repository files and contributed fixes to the codebase.

PROJECTS & HACKATHONS

Oxford Physical AI / Hardware Hackathon — 1st Place

May 2026

Oxford Artificial Intelligence Society — 30-Hour Hackathon | Imitation Learning / VLA Track

- Won 1st place in the Imitation Learning / VLA track; the only team to fully complete the hardware setup.
- Assembled and programmed a Pollen Robotics "Amazing Hand" (8 servo motors) from scratch.
- Built a webcam-based teleoperation system for real-time hand mirroring using computer vision.

AssertionOS — Encode Agentic AI Hackathon

Dec 2025

Encode Club — AI Agent with Web3 Track (48 Hours)

- Built an AI-powered multi-chain security agent on the SpoonOS agentic operating system.
- Integrated Gemini AI for real-time wallet risk assessment, on-chain verification, x402 payments, and ElevenLabs text-to-speech within a fully autonomous security analyst.

Centralised Hospital Patient System — Crisis Zones Hackathon

Nov 2025

Imperial College London

- Built a system to keep medical records following patients across facilities in conflict zones.
- Implemented offline-first architecture with automatic syncing, local caching, and encrypted storage for unstable-connectivity environments.

Full-Stack Desktop Application

Sep 2025 – Apr 2026

University Team Project — Team of 7

- Collaborated with six other developers to build a full-stack desktop application, owning the main storefront module.
- Designed and implemented a finance dashboard with reactive, live-updating KPIs and interactive charts for real-time reporting.

CS50x Capstone Project

2023

Harvard University (Online)

- Completed a final project integrating core concepts across C, Python, JavaScript, and HTML/CSS.

LEADERSHIP & ENGAGEMENT

Committee Member — Brunel University Islamic Society (ISOC)

Jan 2026 – Present

- Coordinated the annual Quran Competition end-to-end and created social content to grow the society's online audience.
- Supported delivery of daily Iftar events for 150+ attendees through venue coordination and logistics under time pressure.
